

AI Analysis of

Stocks & Crypto

Presented by THEUCHIHA

What does it do?

THIS APPLICATION SERVES AS A COMPREHENSIVE FINANCIAL DASHBOARD THAT ALLOWS USERS TO ANALYZE STOCKS, CRYPTOCURRENCIES, AND INDEX FUNDS THROUGH INTERACTIVE PRICE CHARTS AND REAL-TIME VOLUME METRICS, WHILE AUTOMATICALLY TRACKING EVERY SEARCH AND PERFORMANCE RATING IN A BUILT-IN DATABASE FOR EASY HISTORY MANAGEMENT.

How does it work?

THE SYSTEM OPERATES BY FETCHING LIVE MARKET DATA VIA THE YFINANCE API AND PROCESSING IT THROUGH A CUSTOM SCORING ENGINE THAT EVALUATES KEY FINANCIAL HEALTH INDICATORS—SUCH AS P/E RATIOS, REVENUE GROWTH, AND MOVING AVERAGES—TO INSTANTLY CATEGORIZE ASSETS AS 'GOOD,' 'WATCH,' OR 'RISKY' CANDIDATES.
